INNOVATIVE MARINE AIS TECHNOLOGY

Vesper Marine is dedicated to safety on the water for sail, power and work boats. Our award-winning *smartAIS* transponders are designed by the Vesper Marine engineering team with an unwavering focus on quality, exceptional value and outstanding customer support.

vesper
smartAIS[®]
OFFICIAL SUPPLIER

"THE WATCHMATE VISION IS A TRULY MAGNIFICENT INSTRUMENT"

Arie Vermeiden, France

WELCOME TO VESPER MARINE

Established in 2007 to meet the collision avoidance needs of offshore sailors through advanced AIS hardware and software, Vesper Marine is a privately held company founded by Jeff Robbins (CEO), Deirdre Schleigh (Operations Manager) and Carl Omundsen (Head of Design & Engineering).

Deirdre and Jeff's background in product design and seven years offshore sailing experience created the valuable insight that collision avoidance is too important to be buried deep in the menus of today's complex marine electronics.

The WatchMate series is the result of their desire for a powerful, high value safety system that is easy to use and consumes minimal power keeping it always on, always visible, always watching. Vesper Marine has grown rapidly to include a passionate team of developers, customer service and commercial staff. The head office is located in Auckland, New Zealand.

Vesper Marine designs and manufactures safety focused marine electronics and is recognized as a leading innovator of specialized safety systems and products for the marine industry.

SAFETY AT ANCHOR
Anchor Watch

SAFETY FOR YOUR CREW
Man Overboard

WHAT IS AIS?

The Universal Shipborne Automatic Identification System (AIS) is a system of transponders installed on vessels which transmit over two dedicated digital marine VHF channels.

The AIS data is sent from each vessel every few seconds and contains latitude, longitude and movement information such as course, speed and heading. Static information about the vessel is sent every few minutes and includes the name, type of vessel, length, beam, draft, etc. Nearly all commercial ships are required to carry AIS transponders and each year more sail, power and work boats are fitting AIS equipment.

An AIS transponder sends AIS signals, making your vessel visible to others with AIS equipment, and receives and processes the AIS signals for critical safety information. Your safety is enhanced day and night, when offshore or in busy marine traffic areas or in bad weather when visibility is reduced. AIS devices are also fitted on Aids to Navigation and as portable man overboard (MOB) devices on individuals for visibility to all AIS equipped vessels.

WHAT IS *smartAIS*?

Reinventing the future of AIS.

Unlike an ordinary AIS which only sends and receives data, *smartAIS* from Vesper Marine is an active safety system with smart alarm logic that proactively alerts you when you have potential collision situations. It plots your anchor position and alerts you if your anchor drags. It continuously watches for a man overboard and triggers an alarm for quick action.

smartAIS puts you in control of every situation, furnishing you with navigation sensor data, GPS and AIS information. Its intelligent alarm management prioritizes alarms for most critical action. Its low power consumption keeps it always on, always visible, always watching. *smartAIS* transmits information over WiFi to your mobile device for access anywhere on your vessel. Using the WatchMate *smartAIS* app, you can monitor vessel information, customise alarms, change alarm profiles, be alerted if the anchor drags or there is a man overboard and much more, right from your mobile device.

smartAIS technology - Winner of the Pittman Innovation Award in Electronics 2018.

THE *smartAIS* ADVANTAGE ONLY VESPER MARINE HAS IT !

SAFETY UNDERWAY

Collision Prevention

Continuously determine crossing situations, receive collision alarms with full vessel information for critical action.

SAFETY AT ANCHOR

Anchor Watch

Sleep soundly, knowing you'll be alerted if your anchor is dragging.

SAFETY FOR YOUR CREW

Man Overboard

Be alerted when your crew activate an AIS MOB device and see their current location for easy retrieval.

SAFETY UNDERWAY

smartAIS proactively alerts you when you have potential collision situations.

It combines GPS data such as position, course and speed along with AIS data and smart alert logic to continually determine safety implications and alert you. It computes the closest point of approach and time until the closest point of approach and has critical alarms to warn you of vessels posing a threat. Its smart alarm management organizes alarms for the most critical response. The alarms are always on and do not need any additional interface.

Manage your vessel's navigation or take decisive action from anywhere on board using your mobile device and the WatchMate *smartAIS* App or any 3rd party navigation software and apps. Customize alarms, change alarm profiles, activate Anchor Watch and much more. You can connect up to 5 other devices such as a tablet, smartphone, PC or Mac simultaneously or it is expandable to unlimited devices with an external WiFi router.

Designed for minimal power consumption, *smartAIS* is always on, always visible, always watching.

My Instruments		
HDG	Water Speed	COG
355 _T	1.5 _K	165 _T
GWD	GWS	Depth
310 _T	8.2 _K	12 _m
AWA	AWS	Water Temp
40 _P	8.9 _K	25.7 _{°C}

SAFETY AT ANCHOR

smartAIS plots your position in relation to the anchor and marks your positions over time to determine if you are dragging.

The alarm sounds if you drag outside a circular zone configured around your anchor position. Set customized alarms for increased wind speed, wind direction change or minimum water depth. When you drop anchor, activate Anchor Watch using your smart phone, tablet or smart watch from anywhere on-board. Even if your mobile is powered off or the app is closed, the *smartAIS* Anchor Watch continues to monitor the situation and sound the alarm to warn you. You'll be safer and sleep better because of the dedicated Anchor Watch.

smartAIS[®]

It could save your life

SAFETY FOR YOUR CREW

smartAIS silently and continuously watches for a Man Overboard (MOB) and sounds the alarm as soon as it detects one.

Equip your crew members with any manufacturer's AIS MOB device and when your crew activate it, see their continuously updated location, bearing and range for easy retrieval. **smartAIS** can associate the devices to names of your crew members. When an alarm is triggered, it displays the name of your crew member which is quicker and easier to recognize rather than a string of numbers.

Ultimate standalone transponder with color touch screen display with WiFi to view AIS, navigation and instrument data on your smartphone, tablet or smartwatch anywhere on board.

Use a WiFi tablet, smartphone or smartwatch as your AIS, navigation and instrument display. Seamlessly integrates with all MFDs and onboard NMEA networks.

YOUR *smartAIS* RANGE

WATCHMATE VISION²

Get the *smartAIS* advantage of Safety Underway, Safety at Anchor and Safety for your Crew with a fully standalone *smartAIS* transponder, WatchMate Vision². Winner of the NMMA Innovation Award, the WatchMate Vision² has a large 5.7" bright color touchscreen with an intuitive interface for easy operation of all transponder functions. It comes with worldwide coastal outlines for better situational awareness. Its intelligent filtering prioritizes and shows only those targets which have a collision risk. It has a built-in GPS antenna with an optional external antenna when a view of the sky is not available. Use it as a standalone transponder or integrate it with your network of chart plotters, MFDs and NMEA instruments. It has a NMEA 2000 gateway which gives you get complete access to all navigation sensor data in addition to GPS and AIS information.

WATCHMATE XB-8000

It is a full-featured Class B *smartAIS* transponder with all the *smartAIS* functions of Collision Prevention, Anchor Watch and MOB Alarm working actively for the safety of your vessel and crew. It can be viewed on any tablet, smartphone, PC or Mac over WiFi or USB, but is continuously watching and alerting you even when your screen is off. It comes with an alarm and silence switch that can be mounted anywhere on board. It is easy to integrate with your network of chart plotters, MFDs and NMEA instruments. All your navigation instrument data from NMEA 2000 or NMEA 0183 along with GPS and AIS is available on your mobile devices for alarm management and critical action, giving you complete control of every situation. Winner of the Practical Sailor Gear of the Year and Vancouver Boat Show Best in Show awards.

EASY TO INTEGRATE

Interface with devices over NMEA 0183, NMEA 2000, WiFi and USB

NMEA translations – An integrated gateway.

An intelligent integrated gateway that allows different generations and brands of marine electronics on NMEA 0183 or NMEA 2000 networks to talk to each other and transfer data seamlessly, all without extra multiplexing electronics, exhaustive installations or configuring.

The WatchMate Vision² and WatchMate XB-8000 provide AIS data, NMEA 2000 and 0183 data to any third-party software on your computer or apps on your smartphone or tablet via WiFi. Monitor navigation data on your WatchMate App or deckWatch App or use it with third party apps of your choice!

This *smartAIS* transponder supports a wide range of wind, depth, speed, heading, log, temperature, barometric pressure and autopilot PGNs. *smartAIS* transponders also translate NMEA2000 to 0183 for older MFDs and chart plotters.

Problem #1: Sailing and navigation apps cannot talk directly to a NMEA 2000 network as the apps use the 0183 protocol. We need to translate data in another way.

Vesper Marine Solution #1: Vesper Marine AIS transponders receive NMEA 2000 PGNs and automatically convert these to 0183 sentences for smart phones or tablets via WiFi and computers over USB.

Problem #2: A vessel has an older chart plotter (0183 only) with new NMEA 2000 instruments.

Vesper Marine Solution #2: The WatchMate XB-8000 or Vision² receive the new instrument data from the vessel's NMEA 2000 network and automatically convert the data to 0183 sentences for the older chart plotter that is connected to the transponder's power/data cable.

Problem #3: How to control devices on the NMEA 2000 network from a mobile device

Vesper Marine Solution #3: Use third party navigation software on a mobile device to plot a route and transfer the waypoints via WiFi to your *smartAIS* transponder. Since the mobile device uses NMEA 0183 protocol, the transponder translates 0183 sentences to NMEA 2000 PGNs, communicating with the auto pilot to steer the selected course via the NMEA 2000 Bus.

EXCLUSIVE TECHNOLOGY ADVANTAGES

Expert Navigator Stan Honey relies on Vesper Marine AIS technology onboard the 100ft Super Maxi Comanche during her 2016 Transatlantic record breaking run.

“Maintaining an enviable reputation for highly differentiated, reliable and award winning AIS solutions has established Vesper Marine as a global leader.”

vesper

Compatibility with all MFD brands.

Vesper Marine AIS technology has been purpose engineered for 100% compatibility with all AIS enabled MFDs (Multi Function Displays). Every Vesper Marine transponder seamlessly integrates to provide highly accurate AIS data to every brand through NMEA 2000 or NMEA 0183.

Dedicated AIS focus. A respected worldwide AIS specialist.

Vesper Marine technology works to prevent vessel collisions and protects lives at sea. Worldwide, billions of dollars in oil, gas, power and communications assets are protected 24/7 thanks to Vesper Marine's AIS focus and innovative technology.

Safety drives all decision making as the core of the business.

A critical question throughout all R&D stages is 'Does it enhance safety and save lives?'

Exclusive technical and performance advantages.

Features, benefits, problem solvers and long life performance only Vesper Marine offers.

100% vertically integrated.

Hardware, firmware, apps all developed and engineered inhouse to ensure outstanding performance and seamless integration.

EXCLUSIVE VESPER MARINE TECHNOLOGY ADVANTAGES

UNIVERSAL COMPATIBILITY

Compatibility with all MFD brands.

Vesper Marine AIS technology has been purpose engineered for compatibility with all AIS enabled MFDs (Multi Function Displays). Every transponder seamlessly integrates to provide highly accurate AIS data to all MFDs through NMEA 2000 or 0183.

SMART ALARM MANAGEMENT

Dedicated Alarms

Unlike an ordinary AIS which only sends and receives data, Vesper Marine has smart alarm logic that sounds its own dedicated alarm for anchor drag, man overboard or collision avoidance. It also triggers an alarm on your smart phone or tablet.

HIGHER RESOLUTION GPS

5HZ GPS.

All Vesper Marine AIS transponders feature a fast 5Hz GPS update rate providing greater detail and higher resolution plotting. The result is smoother tracking on chart plotters, MFDs and mobile apps.

Vesper Marine as the Primary GPS Source.

One GPS Antenna is required for the entire vessel with Vesper Marine AIS transponders. Competitor's AIS units communicate only position data to an MFD on NMEA 2000 and not the full data required by the MFD making it necessary for two GPS antennas.

Vesper Marine GPS carries position data plus the entire GNSS suite required by chart plotters and MFDs (i.e. Satellite Communications and GPS accuracy data).

LATEST UPDATES

Upgradable AIS Platforms - Robust and future proofed protecting your investment.

Vesper Marine AIS transponders offer a long service life on board. The unique combinations of durable hardware, robust software, market leading electronic protection, and the Vesper Marine upgradable platform advantage ensures customer's AIS investment is maintained and regularly evolving to offer enhanced features.

Upgrades to *smartAIS* transponders are delivered automatically over WiFi right from your mobile phone or tablet. Through ongoing development, Vesper Marine AIS transponders do not become outdated as soon as a new model is launched.

USB PROTECTION

Galvanically isolated USB ports.

Protects the transponder and connected equipment (eg. laptops) against damage due to inadequately bonded or damaged circuits. Significant voltage differences between battery banks and inverter, genset or shore power supply can lead to high current damage with other brands of AIS transponders.

LOW POWER CONSUMPTION

Low Power Consumption

Keeps it always on, always visible, always watching. Unlike MFDs which require high power, Vesper Marine AIS transponders can be always on for extended periods of time. Particularly on a long voyage when charging from solar or wind and when the MFD is switched off, it keeps you alerted of any potential risks.

FULLY WATERPROOF

Fully Waterproof

Vesper Marine AIS transponders are fully waterproof (IPx7) and can be safely mounted almost anywhere on the boat. With an IPx7 rating, it is totally submersible in water up to 1m for up to 30 mins.

deckWatch

**SAFETY LIKE NEVER
BEFORE. NOW ON YOUR
SMART WATCH.**

DAME
NOMINATED
2017

Your *smartAIS* transponder just got smarter with the free *deckWatch* App from Vesper Marine. Get instant information on your smart watch about collision targets, set up Anchor Watch or get alerted if a crew member goes overboard. Also monitor vessel navigation data like depth, speed, wind speed, heading with just a flick of your wrist on *deckWatch*.

The *deckWatch* App from Vesper Marine will transform your boating safety. A free app for your Android Wear 2 smart watch, *deckWatch* gives you instant access to critical safety information. *deckWatch* uses the power of Android Wear 2 to connect your smart watch directly to the WiFi of your *smartAIS* transponder. Get alerted with *smartAIS* alarm features directly on your wrist. It is your safety companion anywhere on the boat. You do not have to reach for your smart phone or tablet or carry them around in rough sea conditions. You can monitor your *smartAIS* transponder with just a flick of the wrist. That's safety on hand exclusively from Vesper Marine.

deckWatch works with Vesper Marine's *smartAIS* transponders WatchMate Vision² and WatchMate XB-8000. Your *smartAIS* transponder immediately transmits AIS, GPS and navigation data over WiFi to your smart watch using the *deckWatch* App.

To get started, go to the Google play store on your smart watch and download the *deckWatch* App. Next, link your smart watch with your transponder WiFi and you are ready to go.

deckWatch is the winner of the NMMA Innovation Award in the Safety Equipment Category (IBEX) as well as a nominee for the DAME Design Award in the Life-saving and Safety Equipment Category (METSTRADE)

Instantly see critical information about a collision risk

Mark and monitor your anchor position

See the bearing and distance of a man overboard

Get access to all navigation instrument data

Collision Prevention

View collision target with details of vessel name, CPA, TCPA, distance and bearing information to help you contact the vessel in an emergency. Scroll from one target to the next. When a target vessel turns orange that's a warning sign of a potential collision. When red, you have a high collision risk and an alarm is triggered. See the target that is on a collision path with your vessel to enable you to take immediate action.

Target Collision Alarm

View Vessel Name, CPA and TCPA of the alarm vessel

The *deckWatch* App on your smart watch works with the WatchMate Vision² or XB-8000 *smartAIS* transponders.

- View AIS Targets received by the Vesper Marine AIS transponder.
- Set up and manage collision prevention alarm profiles.
- Set up Anchor Watch and monitor anchor position.
- Receive MOB alarms with position information for easy retrieval.
- View NMEA 2000 or NMEA 0183 instrument data like Course, Speed, Depth, Wind Speed and other Nav data.

Anchor Watch

When you drop anchor, tap the Anchor Icon on the *deckWatch* App to mark its position. *deckWatch* updates the bearing and distance of the vessel from the Anchor position. If the Anchor drags outside the specified radius, you get an alarm and the anchor icon turns red on the *deckWatch* screen. See the anchor position, monitor navigation information and take necessary action.

Anchor Drag Alarm

See Vessel position using Anchor Watch

Man Overboard

In case a crew member falls overboard and activates an MOB device (of any manufacturer) an MOB alarm sounds on your *smartAIS* transponder. Check the alarm on your *deckWatch* App and continuously monitor the MOB location with bearing and distance for immediate retrieval.

Man Overboard Alarm

See MOB location details

WATCHMATE APP

SAFETY ALARMS, MONITORING AND CONTROL OVER WIFI.

The free Vesper Marine WatchMate App is a great way to configure and monitor the WatchMate Vision² or XB-8000 *smartAIS* transponder. The App supports Apple and Android phones and tablets allowing target views via a 'radar' plotting screen in north-up or heading-up orientations.

Vesper Marine AIS transponders offer an incredibly long service life on board. The unique combinations of durable hardware, robust software, market leading electronic protection and the Vesper Marine upgradable platform advantage ensures customer's AIS investment is maintained and regularly evolving to include enhanced features. Through ongoing development, Vesper Marine AIS transponders do not become outdated as soon as a new model is launched.

For example, the XB-8000 *smartAIS* transponder is completely upgradeable with a continuous stream of feature updates, adding new and unique capabilities. Recent examples include the capability for firmware to be updated via the app, enhanced Anchor Watch features

such as remote Anchor Move, external switch operation and additional alarm profiles.

The WatchMate app on Apple and Android phones and tablets performs automatic transponder firmware updates directly from the mobile device. These updates include significant enhancements provided free for all owners which can also be downloaded by visiting support.vespermarine.com.

On board the vessel, the WatchMate App connects tablets and mobiles (Vesper Marine transponders support up to 5 WiFi devices) to the Vesper Marine AIS transponder providing remote control and direct situational awareness right in the palm of the user. The WatchMate App on the mobile device becomes the interface for managing alarms and remote control of a Vesper Marine AIS transponder and as an extended display screen for the XB-8000.

AIS Data for Navigation Software

Third party apps and software (examples include iSailor, iNavX, iRegatta, DroidAIS, Sail Tracker and SailGrib) also display AIS data. many come with preconfigured set-up for Vesper Marine *smartAIS* transponders. If not, simply enter the *smartAIS* transponder IP address 192.168.15.1 and Port number 39150 to begin receiving data from a Vesper Marine transponder equipped with WiFi.

Please refer to www.vespermarine.com for more information on the AIS data integration capabilities provided from leading third party sailing apps.

WATCHMATE APP ADVANTAGES

Complete Monitoring and Control

View and update vessel information, monitor transponder and GPS status, display all AIS-equipped vessels within range on the easy to view 'radar' plotting screen.

Instant Target Acquisition

Other apps may exhibit significant delays before AIS targets appear. The WatchMate App takes advantage of unique capabilities inside each Vesper Marine AIS transponder, allowing it to display targets instantly when the app is opened.

Manage Alarm Settings

Set collision avoidance alarms such as Closest Point of Approach (CPA) Alarm and Guard Alarm individually or together. The CPA Alarm sounds if a vessel will get too close in the future if you both continue as you are while the Guard Alarm alerts you if a vessel comes within a specified distance of your boat.

Activate Anchor Watch

Control the Anchor Watch function at the windlass or from anywhere onboard. Monitor vessel position relative to the anchor location and receive alarms on phones, tablets and watches in a bunk or anywhere else on board.

The WatchMate App connects seamlessly with a Watchmate Vision² or XB-8000 AIS Transponder. The app allows viewing of AIS targets on mobile devices, however the real power is remote control as the app configures and controls the AIS transponder.

- View AIS Targets received by the Vesper Marine AIS transponder.
- Setup and manage collision prevention alarm profiles.
- Manage MOB alarms.
- Control and view Anchor Watch alarm.
- View the AIS transponder's own GPS Position, Course and Speed.
- Check the operational status of the vessel's AIS transponder.
- Remote control of AIS transponder settings.
- Switch easily between Silent Mode and Normal Transmitting mode.
- Configure the Vessel's AIS data (MMSI, Call Sign, Vessel Type, Vessel Size)
- Perform firmware updates.

Alarm Manager has a menu of profiles. Profiles adjust the alerts and alarms for surrounding vessels by configuring and selecting Anchor, Harbor, Coastal and Offshore modes.

Target Priority lists the AIS targets including Bearing, Range, Speed Over Ground, Closest Point of Approach and Time to Closest Point of Approach.

My Vessel provides current AIS data. latitude, longitude, Course over Ground, Speed over Ground, Heading, Depth, Wind and more.

Silent Mode allows AIS transmission to be turned off (but continues to receive AIS signals). Commonly used at anchor when there is no need to broadcast AIS data.

Vessel Details configures your vessel data including MMSI, Name, Call Sign, Type and GPS Antenna Position.

AWARD WINNING PRODUCTS 2017-18

Dedicated to marine safety solutions since 2007, Vesper Marine focuses on developing AIS solutions from the ground up. We have launched many innovative products in AIS transponder technology that have delighted customers the world over. Over the years our products have been internationally recognized, winning awards for innovation and excellence. Every Vesper Marine product is designed for performance, reliability and ease of use.

In 2017, we launched the world's first transponder App for smartwatches called *deckWatch*. The App was awarded the NMMA Innovation Award and was nominated for the prestigious DAME Award. In the same year, we also introduced *smartAIS* technology, which received the Pittman Innovation Award 2018 while the WatchMate XB-8000 *smartAIS* transponder won Gear of the Year 2017 from Practical Sailor as well as the Vancouver International Boat Show "Best in Show" Award 2018.

As we continue our focus on marine safety solutions, we look forward to introducing many more innovative products that will redefine your boating experience.

"The cherry on top is the fact that the new Vesper Marine *deckWatch* app puts *smartAIS* alarms on an Android Wear 2.0 watch.

The secret sauce is that alarms will be loudly sounded by the transponder itself even if the mobile device is entirely shut down."

smartAIS technology

SAIL Magazine's Pittman Innovation Award 2018. The Award recognizes outstanding new products created by the sailing industry. The innovative distinction of *smartAIS* technology is its extendability to Android Wear 2 smartwatches in addition to smartphones and tablets.

smartAIS[®]

It could save your life

New WATCHMATE VISION²

WORLD'S FIRST TOUCHSCREEN *smartAIS* TRANSPONDER

PACKED WITH THE LATEST, MOST ADVANCED FEATURES

**BRIGHT, EASY TO USE
COLOR TOUCHSCREEN**

**HIGH SPEED WIFI
ACCESS**

STYLISH NEW LOOK

Introducing WatchMate Vision² with a highly responsive, easy to use capacitive touchscreen, bright display, stylish looks, increased WiFi connectivity and lots more.

Powered with *smartAIS* technology, Vision² has safety features that can save lives. Get proactive alerts when you have potential collision situations, if your anchor drags or if there's a man overboard situation.

With its intuitive and easy to use touch screen, scroll through the menu, zoom in and out, see vessel details and navigation data, change alarm settings and more with the most gentle of touches.

Remote control your transponder from anywhere on board with your smartphone, tablet or smartwatch using WiFi. The Vision² enables you to connect up to eight devices simultaneously for greater flexibility.

The Vision² has a stylish black bezel front panel with glossy black side panels, designed to complement every helm and Nav station.

smartAIS technology

SAFETY UNDERWAY

Collision prevention

Continuously determine crossing situations, receive collision alarms with full vessel information for critical action.

SAFETY AT ANCHOR

Anchor Watch

Sleep soundly, knowing you'll be alerted if your anchor is dragging

SAFETY FOR YOUR CREW

Man Overboard

Be alerted when your crew activate an AIS MOB device and see their current location for easy retrieval.

INTERACTIVE USER FRIENDLY SCREEN

The bright 5.7 inch color touchscreen has a radar plotting display with worldwide coastal outlines for better situational awareness. The screen magnifier allows you to select targets without losing position context and scale. The screen has excellent optical clarity over a wide viewing angle and can be viewed using polarized glasses.

PACKED WITH ADVANCED SAFETY FEATURES

DSC calls: Place calls directly to a vessel by touching it on the screen. (Works with ICOM VHF radios)

Alarm banner: Highlights the most critical alarm while also sounding an audible alarm.

Intelligent target filtering: Reduces screen clutter showing only those vessels with a collision risk.

Depth alarm at anchor: Warns you if the water depth falls below a certain level.

Wind alarms at anchor: Get alerted with change in wind direction or wind speed.

MOB labeling: In case of an MOB, view the name of your crew member instead of a string of MMSI numbers.

Anchor Move: After setting your anchor position, you can finetune its position for greater accuracy.

5Hz GPS update rate: Transmits position information faster for better resolution

TECHNICAL DATA

SIZE	172mm wide x 130mm high x 60mm depth (6 7/8" x 5 1/8" x 2 3/8")
LCD TOUCH PANEL	145mm (5 11/16") VGA color TFT capacitive touch
POWER SUPPLY	10-32 VDC 2A max, 6W nominal
ENVIRONMENTAL	Waterproof (IPx7)
OPERATING TEMPERATURE	-25°C to +55°C (-13°F to 131°F)
STORAGE TEMPERATURE	-25°C to +80°C (-13°F to 176°F)
NUMBER OF RECEIVERS	2 AIS, 1 DSC (timeshared)
NUMBER OF TRANSMITTERS	1 AIS
RECEIVE FREQUENCY RANGE	156.025 – 162.025 MHz
TRANSMIT FREQUENCY RANGE	161.500 – 162.025 MHz
AIS SENSITIVITY	-113 dBm < 20% PER
POWER OUTPUT	33 dBm (2W)
GPS SENSITIVITY	-159dBm tracking & navigation -142dBm acquisition
GPS DIFFERENTIAL SUPPORT	SBAS: WAAS, EGNOS, MSAS, GAGAN
GPS NAVIGATION RATE	Selectable 1Hz or 5Hz with magnetic variation included in output
SERIAL DATA	1 USB port (isolated), 1 NMEA input (isolated RS422), 1 NMEA output (RS422)
NMEA 2000 GATEWAY	Converts selected instrument PGN's to and from 0183, WiFi and USB
USB CONNECTOR	Mini USB (USB 2.0)
NMEA 2000 CONNECTOR	NMEA 2000 Micro-C male. Requires female drop cable (not included)
WIRELESS	802.11 b/g/n in Access Point or Client Mode, 10 dBm
ACCESS POINT SECURITY	WPA2 Personal
CLIENT MODE SECURITY	None, WPA & WPA2 Personal

EASY INSTALLATION

- Waterproof, rated IPx7 (submersible to 1m for 30 minutes)
- Built-in GPS antenna does not require an external GPS antenna for most installations
- Optional external GPS antenna when a view of the sky is not available
- Fully NMEA 2000 certified for compatibility
- Interface with any devices over NMEA 0183, NMEA 2000, WiFi and USB
- Galvanically isolated ports to prevent high current damage to your transponder and connected equipment
- World-wide two year warranty

Incorporates Vesper Marine patented AIS technology.

smartAIS®

It could save your life

WATCHMATE XB-8000

smartAIS TRANSPONDER

Best in Show

BUILT-IN COLLISION PREVENTION, ANCHOR WATCH AND MOB ALARMS

DEDICATED ALARMS AND WIFI

The full-featured Class B *smartAIS* transponder from Vesper Marine has all the *smartAIS* functions of Collision Prevention, Anchor Watch and Man Overboard (MOB) Alarms actively keeping your vessel and crew safe.

It can be viewed on any tablet, smartphone, PC or Mac over WiFi or USB, but is continuously watching and alerting you even when your screen is off. Integrate it with your network of chart plotters, MFD's and NMEA instruments. All your navigation instrument data from NMEA 2000 or NMEA 0183 along with GPS and AIS is available on your mobile devices or PC for alarm management and critical action, giving you complete control of every situation.

- Sounds its own dedicated external alarm for anchor drag, man overboard or collision avoidance. Mount the external silence switch anywhere on-board.
- NMEA 2000 / 0183, WiFi and waterproof USB
- Fast 5Hz GPS update rate provides greater detail and higher resolution plotting
- Can be put in Silent Mode (receive-only)
- Includes 50 channel GPS with WAAS/EGNOS and powerful external GPS antenna
- Free WatchMate App for iPhone / iPad / Android providing interactive remote control
- Free *deckWatch* App for Android Wear 2 smart watches providing navigation data and alarms right on your wrist.
- Wide variety of compatible 3rd party apps for Windows, Mac, iPhone, iPad and Android.

WatchMate XB-8000 is the winner of Practical Sailor's Gear of the Year 2017 and the Vancouver Boatshow "Best in Show".

Man Overboard

Be alerted when your crew activate an AIS MOB device and see their current location for easy retrieval.

CONNECT - AS EASY AS IT GETS

NMEA GATEWAY, WIFI AND GPS

WatchMate XB-8000 translates NMEA 2000 instrument data such as heading, wind, depth, speed, log, and temperature. This allows you to view this data, along with GPS and AIS information, simultaneously on up to five WiFi devices (tablets, smart phones, computers) as well as computers via USB or plotters using NMEA 0183. For more than five mobile devices or to combine with on-board internet the XB-8000 can wirelessly connect to other WiFi routers.

ROBUST AND RELIABLE

- Fully waterproof, rated IPx7 (submersible to 1m for 30 minutes)
- Wide operating temperature range
- Galvanic isolated NMEA and USB connections prevent ground loops and damage to connected devices
- Self diagnosis status lights to indicate functioning AIS, GPS and antenna
- World-wide two year warranty

RECEIVE FREQUENCY RANGE	156.025 – 162.025 MHz
TRANSMIT FREQUENCY RANGE	161.500 – 162.025 MHz
AIS SENSITIVITY	-113 dBm < 20% PER
POWER OUTPUT	33 dBm (2W)
GPS SENSITIVITY	-159dBm tracking & navigation -142dBm acquisition
GPS DIFFERENTIAL SUPPORT	SBAS: WAAS, EGNOS, MSAS, GAGAN
GPS NAVIGATION RATE	Selectable 1Hz or 5Hz with magnetic variation included in output
SERIAL DATA	1 USB port (isolated), 1 NMEA input (isolated RS422), 1 NMEA output (RS422)
NMEA 2000 GATEWAY	Converts selected instrument PGN's to and from 0183, WiFi and USB
USB CONNECTOR	Mini USB (USB 2.0)
NMEA 2000 CONNECTOR	NMEA 2000 Micro-C male. Requires female drop cable (not included)
WIRELESS	802.11 b/g in Access Point or Client Mode
ACCESS POINT SECURITY	WPA2 Personal
CLIENT MODE SECURITY	None, WPA & WPA2 Personal

EASY INSTALLATION

- Compact low profile unit can be placed in any orientation
- All cable connection points are contained within the footprint of the unit
- External GPS antenna is included with small cable connector facilitating easy routing through holes and conduits
- Standard VHF antenna connection does not require special cables or connectors
- Fully NMEA 2000 certified for compatibility
- Interface with any devices over NMEA 0183, NMEA 2000, WiFi and USB
- Convenient remote configuration and troubleshooting via smart phone/tablet using WiFi

External Alarm and stainless steel Alarm Cancel Switch Included.

Incorporates Vesper Marine patented AIS technology.

WATCHMATE 850

HIGH PERFORMANCE CLASS B AIS TRANSPONDER

STANDALONE TRANSPONDER WITH INTEGRATED SCREEN AND GPS ANTENNA

EASY TO INSTALL, EASY TO USE

Engineered for ease of install and use, yet packed with comprehensive functionality, the WatchMate 850 is perfect when you want AIS that is robust, reliable and intuitive.

The built-in GPS antenna eliminates the need for another GPS antenna in most installations allowing you to just connect power, plug in a VHF antenna and your complete AIS system is installed. Or you can share an existing connection to an antenna using our unique AIS splitter with 'gain not loss', and connect via NMEA 0183 or USB to show AIS data on your existing chart plotter or computer.

The unique target filtering function reduces clutter in busy locations by taking advantage of a collision avoidance display option which shows only those vessels on a collision course along with a graphical view of their crossing situation.

Sophisticated alarm management eliminates false collision warning alarms that plague chart plotters and other AIS displays.

Super-low power consumption allows you to leave the WatchMate 850 switched on at all times.

The high resolution backlit LCD screen is so intuitive that most users can operate "out of the box" without reading the manual. Large, backlit buttons make operation easy and the WatchMate 850 responds with lightning fast performance.

STANDALONE OR INTEGRATE

ADJUSTABLE FILTERS

Show icons for every vessel

Filtered to only show collision risks

Intelligent filtering enables you to de-clutter your display. The WatchMate 850 automatically calculates the closest point of approach (CPA) and time until CPA (TCPA). You can filter target vessels by range, speed, CPA or TCPA.

You can customize these settings for different situations – Harbor, Coastal, Offshore and Anchor, making it easy to alter your display and alarms with one button.

Vessels and alarms are presented in priority order, making it easy to identify critical hazards.

EASY INSTALLATION

- Built-in GPS antenna does not require an external GPS antenna for most installations
- Optional external GPS antenna when a view of the sky is not available
- Connect to chart plotters with NMEA 0183 and computers with opto-isolated USB
- Standard VHF antenna connection does not require special cables or connectors
- Ultra low power consumption

ROBUST AND RELIABLE

- Fully waterproof, rated IPx7 (submersible to 1m for 30 minutes)
- Rugged construction and easy to use buttons made for the marine environment
- Galvanic isolated NMEA and USB connections prevent ground loops and damage to connected devices
- Self diagnosis ensures AIS, GPS and antenna system are functioning properly
- World-wide two year warranty

ANCHOR WATCH

Press a button when you drop the anchor. The WatchMate 850 continuously shows the range and bearing to your anchor. Your position relative to the anchor is displayed over time so you can visualize your swing. The alarm sounds if your position moves outside the selected range. Automatically corrects for errors caused by the GPS antenna position on-board your vessel (using heading input).

WATCHMATE XB-6000

HIGH PERFORMANCE CLASS B AIS TRANSPONDER

BUILT-IN GPS ANTENNA AND NMEA 2000 GATEWAY

UNLIKE ANY OTHER AIS

This high performance Class B AIS with built-in NMEA 2000 gateway and internal GPS, XB-6000 integrates AIS, GPS and NMEA information so that you can see your safety and navigation on any AIS-capable chart plotter or MFD. Or use your PC and Mac for easy computer navigation. Easily integrate AIS to your existing marine electronics and convert NMEA 2000 & 0183 instrument data to USB, facilitating 3rd party navigation software.

- NMEA 2000 / 0183 and waterproof USB
- Compatible with all NMEA 2000 certified chart plotters and MFD's
- The only AIS transponder that can be used as a GPS source for NMEA 2000
- Fast 5Hz GPS update rate provides greater detail and higher resolution plotting
- Can be put in Silent Mode (receive-only)
- Includes 50 channel GPS with WAAS/EGNOS and powerful external GPS antenna
- Built-in internal GPS antenna allows for easy installation when the XB-6000 has a view of the sky. Perfect for small vessels
- Galvanic isolated USB and NMEA ports protects the transponder and your other equipment against damage and installation problems

EASY PLUG AND PLAY

The only AIS transponder with fast 5Hz GPS navigation rate. Use the XB-6000 as your primary GPS source for your NMEA 2000 and NMEA 0183 equipment.

NMEA 2000 TO 0183 GATEWAY

The XB-6000 translates NMEA 2000 instrument data such as heading, wind, depth, speed, log, water temperature and more. This allows you to view this data, along with GPS and AIS information, simultaneously on all AIS-capable chart plotters, multi-function displays and computer software.

Works seamlessly with Garmin, Raymarine, Simrad, B&G, Lowrance and others.

The built-in internal GPS antenna means there is no need for multiple external GPS antennas in many installations. You can even use the XB-6000 as your primary GPS source for all chart plotters and multi-function displays.

ROBUST AND RELIABLE

- Fully waterproof, rated IPx7 (submersible to 1m for 30 minutes)
- Wide operating temperature range
- Galvanic isolated NMEA and USB connections prevent ground loops and damage to connected devices
- Self diagnosis status lights to indicate functioning AIS, GPS and antenna
- World-wide two year warranty

FAST AND EASY INSTALLATION

- Compact low profile unit can be placed in any orientation
- All cable connection points are contained within the footprint of the unit
- External GPS antenna is included with small cable connector facilitating easy routing through holes and conduits
- Standard VHF antenna connection does not require special cables or connectors
- Fully NMEA 2000 certified for compatibility
- Interface with any devices over NMEA 0183, NMEA 2000 and USB
- Convenient configuration and troubleshooting via free PC and MAC software
- Solve common antenna issues using built-in VSWR meter

Universal Compatibility

Fully compatible with all AIS capable MFDs and plotters.

No MFD upgrade required if the MFD is not AIS capable. Use a dedicated self-contained display or tablet via WiFi.

Use a tablet with a wide variety of apps to view navigation and instrument data from your NMEA network.

Easy Installations

Simple configuration – designed for fast and efficient install.

No PC needed – use the WatchMate App via WiFi (Vision² and XB-8000) or the on-screen interface (Vision² and 850) to setup.

Robust & safe – waterproof (IPx7) with fully isolated interfaces.

Leading Support

Diagnostics via your phone – use a smart-phone or tablet via WiFi for diagnostics and troubleshooting.

Antenna troubleshooting – tools for identifying difficult to find antenna problems.

AIS expertise – nobody knows AIS like Vesper Marine. Customers rate Vesper Marine technical support as the best in the world.

SHARED AIS/VHF ANTENNA

VA159 HIGH PERFORMANCE AIS AND VHF ANTENNA

SHARED AIS/VHF ANTENNA

The VA159 is a shared AIS/VHF antenna, specially designed by Vesper Marine for both AIS and VHF. In the past, one had to choose an AIS-tuned antenna that was optimized for AIS frequencies but had lower performance for VHF radio, or choose an antenna that was designed for VHF radio communications but not optimal for AIS.

This shared antenna, used along with the SP160 antenna splitter, has two key features that solve this dilemma:

- Wide bandwidth of 6 MHz means it will cover 3 MHz above and below the center point
- 159 MHz center frequency gives excellent performance for both VHF radio (156 MHz) and AIS (162 MHz)

The result is an antenna with superior performance over other designs. It has less than 1.5:1 VSWR at 156 MHz all the way up to 162 MHz. With other VHF or AIS antennas you get low VSWR only at one end of the frequency band, not both.

FEATURES

- Specially designed 1.0m (3ft) 316 stainless steel antenna
- Replaceable stainless steel whip if it gets lost or damaged
- Designed and optimized specifically for sharing between VHF radio and AIS transponder
- Includes SO239 socket and 316 stainless steel mounting bracket
- Perfect for masthead or installations where the L-bracket is used
- Detachable cable allows for any length to be used.

DEDICATED AIS ANTENNA

VA162 HIGH PERFORMANCE AIS ANTENNA

DEDICATED AIS ANTENNA

This dedicated AIS antenna is specially tuned to work at the higher frequency required for maximum performance of AIS systems. It is perfect for installations where the lowest possible windage is a requirement. Although termed a 'masthead' antenna, it is also suitable for mounting anywhere with the L-bracket. Mounting locations include along solar panels, bimini sides, on an arch, above a radar or at the upper edge of a cabin top.

FEATURES

- Specially designed 1.0m (3ft) 316 stainless steel antenna
- Replaceable stainless steel whip if it gets lost or damaged
- Designed and optimized specifically for AIS
- Includes SO239 socket and 316 stainless steel mounting bracket
- Perfect for masthead or installations where the L-bracket is used
- Easily adapted to any installation configuration
- Detachable cable allows for any length to be used
- Robust mechanical design for performance in all weather conditions

AIS VHF SPLITTER

HIGH PERFORMANCE SPLITTER FOR AIS, VHF AND AM/FM

A SPLITTER WITH GAIN, NOT LOSS

A built-in low noise amplifier makes the Vesper Marine antenna splitter uniquely able to improve AIS reception and range by providing signal gain.

Unlike other splitters, there is now no need to compromise on performance when utilizing the convenience of an existing antenna and cabling to install an AIS receiver or transponder.

Ideal for use with low power AIS man overboard devices.

TECHNICAL DATA

RF PERFORMANCE	Frequency Range 156MHz to 163MHz
OPERATING TEMPERATURE	-25°C to +55°C (-13°F to 131°F)
OVERALL SIZE (INCL CONNECTORS)	135mm Long x 107 Wide x 56 Deep (5 5/16" x 4 13/64" x 2 13/64")
VHF / AIS CONNECTORS	SO239 (requires PL259 plug)
AM / FM CONNECTORS	BNC, optional cable available BNC to Motorola plug
POWER SUPPLY	10 - 32 VDC, <0.8W nominal
AIS RECEIVE GAIN	12dB
INSERTION LOSS	VHF RX <1.5dB / VHF TX <1dB / AIS TX <1dB
AIS SENSITIVITY, WITH VESPER MARINE TRANSPONDERS	-119 dBm, 6dB improvement

ENSURING OPTIMAL PERFORMANCE

- Provides amplification to the AIS signal resulting in much higher AIS sensitivity, improving AIS receive range
- 4 convenient status LED's (power, VHF transmit, AIS transmit, antenna quality)
- VHF Fail-safe. VHF radio always has priority and can always transmit even if the power to the splitter fails
- The unique antenna quality LED indicates a problem with the antenna, cable or installation
- Waterproof, high quality durable construction made specifically for marine use
- VHF-in-use indicator appears on the screen of the WatchMate 850 and WatchMate Vision² whenever the VHF radio is being used. This indicates when AIS traffic is delayed due to antenna use by the VHF radio
- Provides AM/FM radio connection. An optional cable with a standard "Motorola plug" is available to make installation easy. Plugs directly into almost all automotive or marine head units
- No adapters or special patch cords needed for VHF and AIS. Uses standard PL-259 patch cables (Two 2m - 6.5' patch cables included)
- 12/24 volts with very low power consumption

INNOVATIVE APPLICATIONS OF AIS TECHNOLOGY - VOLVO OCEAN RACE

Volvo Ocean Race employs Vesper Marine AIS technology to make races safer. Vesper Marine's Virtual AIS system is used to mark the course perimeter in In-Port Races held at host cities across the globe.

Volvo Ocean Race, one of sailing's biggest events and the ultimate human adventure, has selected Vesper Marine's AIS system for the In-Port Races of the Volvo Ocean Race.

Vesper Marine's Virtual AIS system is used to mark the course perimeter for In-Port races. Establishing a virtual perimeter around the course, the Virtual AIS stations broadcast information to spectator and race official boats using AIS frequencies – painting the course on their navigation systems. As a result, spectator and official vessels can quickly and easily see their own positions relative to the course boundaries on their navigation displays, to ensure they are safely outside the course at all times.

Competitors in the Volvo Ocean Race travel 45,000 nautical miles around the world, touching six continents and stopping in 12 landmark cities. The In-Port Races are short, action-packed events used as tie-breakers in the final points tally. Scheduled in

the Host Cities, they are a huge spectator draw, from sailing enthusiasts to the local population – as each of the Host Cities has a rich sailing tradition.

The virtual marks can be configured remotely to change with conditions and can also be easily moved to each host city using the same hardware and cloud based software.

Vesper Marine is proud to be associated with the Volvo Ocean Race.

“We are always on the lookout for innovative solutions to make our race safer and more efficient.

This exciting new partnership established with Vesper Marine will allow fans around the world to enjoy the In-Port Races from one of the best spectator seats in the house – on the water.”
